

Sandblasters

Featuring precision nozzles, optimum viewing and unique mixing technology

95
YEARS

Basic eco

Compact sandblaster

Item Code: 29494025

- Compact, yet provides maximum field of vision thanks to a large viewing panel with innovative LED lighting.
- Uniform flow of abrasive guarantees consistent surface conditioning with very low consumption.
- Allows for quick switching between abrasives without interrupting work.

Basic master

Fine spacious sandblaster

Item Code: 29484025

- Precise blasting with the special mixing chamber technology of Renfert's Venturi principle.
- Large volume blasting chamber provides maximum freedom of movement.
- With many extras including ergonomics, ventilation and durability this unit is perfect for labs with high workloads.

Basic quattro

Fine sandblaster with 2-4 tanks

Item Code: 29581000

*Comes with 2 tanks. Additional tanks sold separately.

- Suitable for simultaneous applications including surface conditioning, devesting and preparation of metal frameworks for oxide firing.
- Can be quickly retrofitted for up to 4 tanks, enabling several applications simultaneously.
- Easy, toolless tank extension via quick release coupling and color-coded tank selectors.

Basic quattro IS

Fine sandblaster with Immediate Stop technology

Item Code: 29591000

*Comes with 2 tanks. Additional tanks sold separately.

- Suitable for extremely delicate fissure blasting as a result of the IS – Immediate Stop technology.
- IS technology reduces blasting costs by up to 80%.
- Can be quickly retrofitted for up to 4 tanks, enabling several applications simultaneously.
- Quick and safe operation due to exact pressure adjustment and pressure control for every tank.
